

AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions and listings of claims in the application:

1. (Currently Amended) [[An]] A computer readable medium for storing an electronic data record, the electronic data record comprising data of an invoice, the record including a plurality of data fields, the plurality of data fields comprising:

a data field for characterization of a state of the processing of the invoice, the data field being used for calling one or a plurality of state dependent workflows, wherein the called state dependent workflow depends on the state entered by a user.
2. (Currently Amended) The computer readable medium for storing the electronic data record of claim 1, wherein the data field comprises one or more characters for the characterization of the state.
3. (Currently Amended) The computer readable medium for storing the electronic data record of claim 1, wherein the data field is linked to a table, which comprises a description of the state.
4. (Currently Amended) The computer readable medium for storing the electronic data record of claim 1, wherein the data field is directly or indirectly linked to a table, the table comprising one or more instructions which depend on the state and are automatically executable by a computer system.

5. (Currently Amended) The computer readable medium for storing the electronic data record of claim 1, wherein the data field is directly or indirectly linked to a table, the table comprising an assignment of the state to an event which can occur during the processing of the invoice.

6. (Currently Amended) The computer readable medium for storing the electronic data record of claim 1, wherein the electronic data record is at least partially accessible via the Internet and wherein the content of the data field for the state or a data field for comments is editable via the Internet.

7. (Currently Amended) The computer readable medium for storing the electronic data record of claim 1, wherein the data field for the state is linked to a table, the table comprising one or more state dependent proposals for changing the state.

8. (Currently Amended) A method for processing an electronic data record containing data of an invoice, the electronic data record including a plurality of data fields, the plurality of data fields comprising a data field for characterization of a state of the processing of the invoice, the method being performed by one or more processes running in a computer platform and comprising:

calling a dialogue for entering a state by a user; and
calling one of a plurality of state dependent workflows, wherein the called state dependent workflow depends on the state entered by the user.

9. (Original) The method of claim 8, further comprising:
assigning the state entered by the user to a data field for the state.
10. (Original) The method of claim 8, further comprising:
performing at least one of selecting, sorting, evaluating, and analyzing the
electronic invoice according to the state.
11. (Cancelled)
12. (Currently Amended) The method of claim [11] 12, wherein the state is
selectable by the user according to predefinable events.
13. (Original) The method of claim 8, wherein the method is for use in
business software, particularly in an enterprise resource planning software.
14. (Currently Amended) A computer system for processing an electronic
data record containing data of an invoice, the electronic data record including a plurality
of data fields, the plurality of data fields comprising a data field for characterization of a
state of the processing of the invoice, the computer system comprising:
memory including program instructions;
input means for entering data;
storage means for storing data; and

a processor responsive to the program instructions for calling a dialogue for entering a state by a user; and

program instructions for calling one of a plurality of state dependent workflows,
wherein the called state dependent workflow depends on the state entered by the user.

15. (Original) The computer system of claim 14, further comprising program instructions for assigning the state entered by the user to a data field for the state.

16. (Original) The computer system of claim 14, further comprising program instructions for performing at least one of selecting, sorting, evaluating, and analyzing the electronic invoice according to the state.

17. (Cancelled)

18. (Currently Amended) The computer system of claim [[17]] 14, wherein the state is selectable by the user according to predefinable events.

19. (Original) The computer system of claim 14, wherein the computer system is for use with business software, particularly with an enterprise resource planning software.

20. (Currently Amended) A computer-readable medium comprising instructions for processing an electronic data record containing data of an invoice, the

electronic data record including a plurality of data fields, the plurality of data fields comprising a data field for characterization of a state of the processing of the invoice, the computer-readable medium comprising instructions for:

calling a dialogue for entering a state by a user; and
calling one of a plurality of state dependent workflows, wherein the called state dependent workflow depends on the state entered by the user.

21. (Original) The computer-readable medium of claim 20, further comprising instructions for:

assigning the state entered by the user to a data field for the state.

22. (Original) The computer-readable medium of claim 20, further comprising instructions for:

performing at least one of selecting, sorting, evaluating, and analyzing the electronic invoice according to the state.

23. (Cancelled)

24. (Currently Amended) The computer-readable medium of claim 24, wherein the state is selectable by the user according to predefinable events.

25. (Original) The computer-readable medium of claim 20, wherein the computer-readable medium comprises enterprise resource planning software.

26. (Cancelled)
27. (Cancelled)
28. (Original) An electronic data structure for an electronic data record according to any one of claims 1 to 7.
29. (Original) An electronic data structure according to claim 28, wherein the electronic data structure is for use with enterprise resource planning software.
